

## Pynamite 10 gal Mosquito Misting System

**The only mosquito misting system of its kind**

Finally, a mosquito misting system designed especially for smaller properties, boat docks, small barns, and travel. Rid your yard of mosquitoes, spiders, and nuisance insects once and for all. The 10 gallon Pynamite Mosquito Misting System uses the same Wi-Fi/Bluetooth controller, pump, and motor as the Cube Pro.

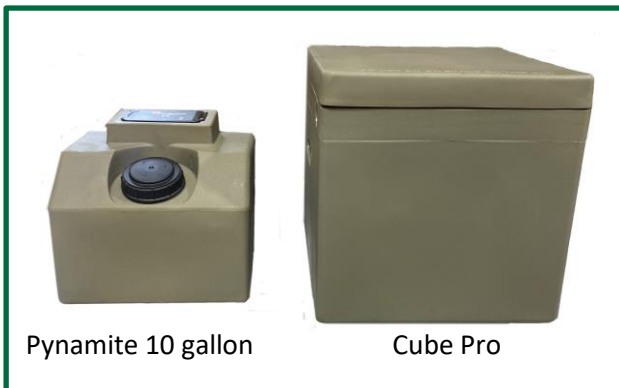

The user friendly, Wi-Fi/Bluetooth controller connects to a phone through the free Pynamite App. The Pynamite App is used for system setup and as the remote control. Through the Wi-Fi feature of the app, the system can be accessed from anywhere when the controller is connected to the internet.

And if no internet is available the system is accessed through the app over Bluetooth. Several phones can be paired to a system, so while you're paired, your customers can be too. And you can pair all your customer's wi-fi connected systems to your phone. The controller tracks dusk and dawn, so no more resetting the mist cycles as the days get longer. It will also indicate when it is time to refill the tank.

The pump and motor are securely located behind the back plate. The 10 gallon also has jet nozzle agitation to keep the misting concentrate in suspension. The system comes with a full weatherproof cover to protect the controller and plugs into a standard outlet.

The Pynamite 10 gallon is perfect for smaller yards, docks and barns. It is also small enough to take on the road to weekend properties or any family outing. While it can handle up to 60 nozzles, 10-20 nozzles are suggested to avoid having to refill too often.

Pynamite 10 gallon

Cube Pro

### FEATURES

- Wi-Fi/Bluetooth controller
- Custom designed 10 gallon tank
- Pynamite app allows for easy set up and serves as a remote control to Stop, Start, or Skip a mist
- Programmable mist days and times
- Automatically knows dawn and dusk
- Agitation is standard
- Filter to help keep nozzles clean
- Liquid Level Status
- Mist Saver suspends misting in cold temperatures
- Weatherproof cover
- Plugs into a standard outlet
